

I. AMENDMENT

Please make the following amendments:

In the Specification:

Please amend the specification as follows:

Please replace the paragraph beginning at page 5, line 14, with the following:

a1
--The invention also concerns seed of the corn plant LIZL5. A sample of this seed has been deposited under ATCC Accession No. PTA-2192. The inbred corn seed of the invention may be provided as an essentially homogeneous population of inbred corn seed of the corn plant designated LIZL5. Essentially homogeneous populations of inbred seed are those that consist essentially of the particular inbred seed, and are generally free from substantial numbers of other seed, so that the inbred seed forms between about 90% and about 100% of the total seed, and preferably, between about 95% and about 100% of the total seed. Most preferably, an essentially homogeneous population of inbred corn seed will contain between about 98.5%, 99%, 99.5% and about 99.9% of inbred seed, as measured by seed grow outs.--

Please replace the paragraph beginning at page 20, line 17, with the following:

a2
--LIZL5: The corn plant from which seeds having ATCC Accession No. PTA-2192 were obtained, as well as plants grown from those seeds.--

Please replace the paragraph beginning at page 27, line 8, with the following:

a3
--A deposit of 2500 seeds of the inbred corn plant designated LIZL5 has been made with the American Type Culture Collection (ATCC), 10801 University Blvd., Manassas, VA on July 5,
